Fence Webb Reflective Fence Tape

Our FenceWebb hi-vis barrier tape offers a simple and effective solution for enhancing safety and security.

Designed for easy installation, it can be seamlessly woven between the upright spindles of our Heras fencing. Each strip measures 3.5 metres in length and features an eyelet at both ends, allowing for secure fastening with a cable tie or other fasteners.

The highly retro reflective strip on the tape ensures that your fence is easily visible in vehicle headlights and torchlight, making it ideal for use at night and in adverse weather conditions. The luminous fabric also ensures visibility in bright daylight. Overall, this high-visibility warning tape is a cost-effective choice for improving site safety and security.

Key Features

- > High visibility
- > Ideal for night and adverse weather conditions
- > Provides a visual aid for site vehicle or pedestrian routes
- > Eyelets at each end for easy attachment
- > Durable & Washable
- > Easy to transport
