## Razorback Gate Barrier Foot

The Razorbacks feet have a unique design ensures that it does not protrude into walkways or areas with public access, making it safer for pedestrians.

This foot is an enhanced version of the Anti-Trip Barrier Foot, designed to improve safety around utility work areas by minimizing the risk of stumbles and falls. Compared to the standard Anti-Trip Foot, the Razorback Foot is twice as large, which significantly enhances its stability and wind resistance. This makes it a superior choice for environments where wind and stability are concerns.

## Compatibility

This foot is compatible with the following barriers:

- > Gate Barrier
- > Boss Barrier
- > Vision Barrier

## Razorback Foot Specification

Description	Size (mm)	Weight (kg)
SBS200140 - Razorback Gate Barrier Foot	H185 x W480 x D100	4

## Key Features
