Rubber Grass Mat – 1500 x 1000mm

Create a safe, secure, and durable surface for your playground or outdoor area with our high-quality Rubber Grass Mats.

Available in 16mm or 23mm thicknesses, these mats are designed to provide excellent impact absorption, ensuring a cushioned landing for children and adults alike.

Ideal for playgrounds, walkways, and high-traffic outdoor spaces, these mats offer safety, style, and practicality. The 23mm option is also available in a 10.5m roll for easier installation. Their moulded anti-slip cellular structure allows grass to grow through, securing the mats with the Rubber Grass Mat connector for a seamless, natural look.

Designed for comfort and durability, these mats reduce strain, improve drainage, and prevent erosion. Their unique structure enhances water flow, preventing pooling and supporting healthy grass growth—perfect for high foot-traffic areas.

Rubber Grass Mat in situ

Closeup of Mat

Description	Size (mm)	Weight (kg)
GPS230700 – Rubber Grass Mat – 16mm	H16 x W1500 x D1000	9.5
GPS230710 – Rubber Grass Mat – 23mm	H23 x W1500 x D1000	15.5

Key Features

- Impact-absorbing natural rubber matting: the 23mm depth meets BS EN 1177:1998 standards, rated for a critical fall height of 3.3m.
- Moulded anti-slip cellular structure
- Enhanced ground drainage and erosion protection in areas with high foot traffic or heavy use
- Easy installation
- Proven alternative to wet-pour or rubber tile safety surfaces, providing cost-effective and long-lasting results
- Made from natural and recycled rubber
- Versatile – can be cut to size or extended to create any desired shape or area coverage.
- Temperature resistance: Can withstand from -20°C to +130°C

Can be used as a walkway path
