Barrier Hoard

The Barrier Hoard is a one-piece hoarding panel system crafted from 100% MDPE, specifically designed to enhance the performance of our GB2 and RB22 water filled barriers.

This solution is a great alternative from the traditional steel hoarding panels and is 100% recyclable too. The Barrier Hoard is also compatible and can be used with GB2 or RB22 water filled barriers and both are Mira wind tested, both having a class B rating.

The installation is quick and straightforward, with no sharp edges, ensuring safety. Built for longevity, the Barrier Hoard is weather-resistant and rust-proof, providing durability in various conditions. Additionally, these panels can be pressure washed, allowing for effortless cleaning and upkeep while keeping them looking their best.

Barrier Hoard installed with GB2

Barrier Hoard installed with RB22

Barrier Hoard Specification

Description	Size (mm)	Weight (kg)
WFS150850 - Barrier Hoard	H1400 x W2060 x D102	25

Key Features

- > Simple and fast to install - no sharp edges
- > Robust and dent resistant
- > Made from 100% recycled MDPE
- > Can be filled with water or sand
- > 100% recyclable
- > GB2 Mira Wind Tested Class B 34mph
- > RB22 Mira Wind Tested Class B 38mph
