Self-Weighted 1 Piece Traffic Cones

One-piece traffic cones are essential tools for safety and organization on roads and construction sites, known for their simple and sturdy design.

Made from 100% recycled thermoplastic, which can also be recycled, these traffic cones are designed for swift deployment in space marking scenarios, offering a practical solution for redirecting traffic and delineating work areas.

Equipped with a retroreflective sleeve, available in single or double stripes, these cones ensure heightened visibility, particularly in low-light conditions.
