## Automatic Raising Arm Barrier

Information Sheet

### Automatic Raising Arm Barrier

*Our automatic barriers are a useful addition to your perimeter security solution. Commonly used in parking facilities, check points sites, automatic barriers are useful tool for restricting vehicle site access.*

This low maintenance, highly customisable, is robust, durable and ensures a professional finish to your construction site. Our automated barriers are made from high quality steel supplied with red and white stripes as standard. They also conform to all safety specifications and regulations.

Ideal for use in conjunction with construction hoarding and CCTV, alarms, and surveillance solutions (also available from SafeSite Facilities).

Installed automatic raising arm barrier
