

TITAN EXPANDER BARRIER INSTALLATION GUIDE

The Titan barriers connect with Chapter 8 Titan barriers and expand to up 3.1 metres.

People to Install:

Equipment / Accessories Needed:

- Flexiclips

1

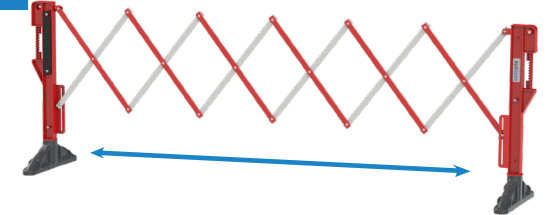

Place the barrier in desired position

2

Unhook the hinge.

3

Take hold of the carry handle/barrier arm and extend the barrier to the required width.

4

This barrier attaches to another titan expander or titan barrier via the Flexiclip. Push the clip at the back of the Flexiclip and slot to attached barrier.

5

Make sure the barriers and connections are secure, then repeat this process as many times as needed.

Useful Tip: The plastic clips ensure that the barriers remain linked together even under heavy stress. Packs of clips can be ordered from our sales team.

Wear the appropriate PPE for this task.
